

Qigong Connection June 15, 2013

Where the Earth Meets the Sky

We are being called to focus our healing gifts and energies on the area of Tibet. Patricia and Kristin will support and enhance the groups experience by offering a toning before we begin the healing process. After the toning the group will have an opportunity to go within and bring forth information that will offer us the guidance that will open our hearts to assist us in our healing endeavor.

Patricia Vivant is an energy healer. She worked in Germany for 20 years and is now practicing in Burnsville. Patty has participated in sound healing in many places around the world including Tibet, Egypt, Europe and the US.

Kristin Fischer is a sound healer and speech language pathologist from Minneapolis. In addition to sound work, she is a student of qi gong, reiki and transpersonal hypnotherapy.

Information for the members: Energy streams work through Patty and Kristin as they tone with crystal bowls, metal bell and voice, to deliver specific energetic frequencies that align with the sound signatures of each person in the group individually and with the group as a collective. The toning meditations are unique to each group - bringing in energies for each person that carry customized clearing, balancing and healing from the planets and universes they represent here on Earth. People often comment that they hear "songs from home" during the toning that invoke strong feelings of healing, love and connection.
