

October 15, 2016 - Presentation by Jamie Lee

Within the Knowing Field: An Introduction to Family Constellation Work

Jamie Lee will provide a window into the fundamental energy work known as Family Constellation Work as developed by Bert Hellinger, a German psychotherapist. Hellinger developed this approach while working with war-torn families in post WWII. Again and again he noticed that, no matter the events, a deep and lasting love and loyalty appeared to be flowing between members of a family that seemed to transcend time, space, and even death. He began to identify these as “the hidden orders of love.”

During the presentation, participants will be given an experience of this process as well as simple ways to apply this “knowing field” in their own energy work and within families.
